3. [] Messrs. []

met separately with Mr. Charles Ducander and Mr. Peter Girardi, of the staff of the House Science and Astronautics Committee. We discussed with Ducander the follow ups from the briefing of 26 July. It was Ducander's feeling that the Agency need not concern itself with providing any sensitive written material on the Soviet space program but he will discuss this with Chairman Miller. Ducander was briefed on the special security factors with regard to the material presented at the briefing and was told that he would be "signed up" within the next few days.

The Agency group then met with Mr. Girardi in an effort to establish an area within which we could cooperate but would not become involved in supplying to the Committee written material in special security classifications. It was agreed that we would provide him with written material that did not involve special handling and would then brief him on additional areas involving sensitive aspects. (This is a result of the request from Representative Olin Teague's subcommittee of House Space for the Agency's cooperation in providing the staff with information on space programs of foreign governments.) Mr. [] is having OSI personnel pull this material together.
